## SOURCES OF THE AGRICULTURAL IMPORTS OF THE UNITED STATES, 1898-1902.

---

### AGRICULTURAL IMPORTS, BY COUNTRIES.

Nearly \$414,000,000 worth of agricultural produce was imported into the United States during the fiscal year 1902. Brazil, the United Kingdom, Cuba, Japan, France, Italy, and Mexico stood foremost in the long list of countries from which this produce came. Of the remaining sources of supply the most important were Germany, the British East Indies, the Chinese Empire, the Dutch East Indies, Egypt, the British West Indies, and Argentina.

Brazil far outranked all other countries as a factor in the trade, furnishing agricultural products valued at \$62,000,000. Aside from coffee, which was decidedly the largest item, the principal articles received from Brazil were sugar, hides and skins, cocoa, and fruits and nuts.

Next to Brazil the United Kingdom was the leading source of supply. In the markets of that country we made purchases amounting to \$36,000,000. These purchases embraced a large variety of articles, some of the most important being wool, hides and skins, manila hemp, alcoholic liquors, vegetable oils, vegetables, cotton, and feathers. From the nature of the items mentioned it will be seen that our imports from the United Kingdom consisted to a considerable extent of products originating in other countries.

During 1901 Cuba stood second only to Brazil as a source of importation, but owing to the exceptionally small shipments of sugar last year the island dropped into third place, supplying only \$29,000,000 worth of agricultural produce, or nearly \$10,000,000 less than in the year before. Sugar was of course the principal item among the imports from Cuba. Other products received from that source in considerable quantities were tobacco, fruits and nuts, molasses, and cocoa.

Our imports of agricultural produce from Japan during 1902 were exceptionally large, having a value of \$26,000,000. Silk was by far the most important item, with tea ranking second. Rice was another product imported quite extensively from Japan.

Unusually large imports came also from France in 1902, the value being \$23,000,000. The products supplied most extensively by that country were wines and spirits, hides and skins, silk, fruits and nuts, argols, vegetables, horses, and olive oil.

From Italy products of agriculture worth \$21,000,000 were received. The principal item was silk. Other leading imports from Italy were lemons, argols, cheese, olive oil, and hemp.

Mexico sent us agricultural products valued at \$20,000,000. More than half of this sum was paid for a single item—sisal grass. Hides and skins, coffee, and cattle were also imported in considerable quantities from Mexico.

Our agricultural imports from Germany were smaller than for several years, having a value of only \$19,000,000. Hides and skins formed the largest item. Beet sugar, which was the leading import from Germany in previous years, fell into second place. Wines, spirits, and malt liquors comprised one of the important items, as usual. Other agricultural products shipped to us in large quantities by Germany were rice and rice flour, bristles, hops, seeds, and vegetable oils.

The British East Indies supplied products of agriculture worth \$18,000,000. Large importations of hides and skins were received from that source. Other products imported quite extensively from the British East Indies were jute, spices, indigo, vegetable oils, coffee, and tea.

From the Chinese Empire agricultural imports worth \$17,000,000 were received. The item of leading importance was silk. Large consignments also of tea, hides and skins, wool, and rice came to us from China.

The agricultural products furnished by the Dutch East Indies had a value of \$14,000,000. Sugar was the principal article. Among other imports from that source were coffee, spices, and hides and skins.

Egypt contributed agricultural produce to the value of \$11,000,000. Aside from cotton, which formed by far the largest item, sugar was the only import of any considerable value supplied by Egypt.

From the British West Indies we received agricultural products worth \$10,604,000. Bananas, sugar, cocoa, and coffee were the leading items.

Our agricultural imports from Argentina during 1902 amounted in value to \$10,573,000. They consisted principally of hides and skins, wool, and flaxseed.

Among the various other sources of our agricultural import trade for 1902 the only countries that contributed shipments aggregating over \$5,000,000 in value were the following: The Netherlands, \$9,306,000; Canada, \$8,965,000; European Russia, \$6,138,000; and Venezuela, \$6,016,000.

## SUMMARY STATEMENT, BY COUNTRIES, OF TOTAL AGRICULTURAL IMPORTS.

Official<sup>a</sup> statistics as to the value of the agricultural products imported into the United States from the various countries of supply during each year from 1898 to 1902, inclusive, are presented in the following tabular statement:

#### AGRICULTURAL IMPORTS FROM ISLAND POSSESSIONS.

During 1902 the several island possessions of the United States contributed quite extensively to the volume of agricultural imports received. From Hawaii we imported products of agriculture having an aggregate value of \$24,000,000; Porto Rico sent shipments worth \$6,529,000; while from the Philippines imports to the value of \$6,510,000 were recorded. The total value of the agricultural products received from these three sources amounted to about \$37,000,000.<sup>a</sup>

<sup>a</sup> In 1902 no agricultural imports were recorded as coming from Guam. The records for 1901, however, showed imports from that source amounting in value to \$1,040. These imports for 1901 consisted of 250 pounds of coffee, worth \$40, and \$1,000 worth of fruits and nuts.

## HAWAII.

Among our agricultural imports from Hawaii in 1902 sugar was of course the leading factor. The amount received was 720,553,000 pounds, and the value \$23,920,000. Next to sugar coffee formed the principal item, the consignments of the year aggregating 1,083,000 pounds, worth \$114,000. Two animal products—wool and hides—were also purchased in large quantities from Hawaii. The importation of hides, including skins, was recorded at 851,000 pounds, with a value of \$78,000. Our receipts of Hawaiian wool, although smaller than usual, amounted to 151,000 pounds, worth \$39,000. Fruits and nuts to the value of \$71,000 comprised an item of considerable importance. The only other agricultural import from Hawaii with a value in excess of \$10,000 was rice. Of this product 341,000 pounds, worth \$15,000, were received.

The following table shows in detail the quantity and value of agricultural products shipped from the Hawaiian Islands to the United States during 1901 and 1902, as reported to the Treasury Department by the customs officials on the islands:

## PORTO RICO.

Our agricultural import trade with Porto Rico, like that with Hawaii, consists largely of the single item—sugar. In 1902 the Porto Rican sugar consigned to the United States was valued at \$5,890,000, the shipments aggregating 183,817,000 pounds. Molasses was purchased from the island to the extent of 1,614,000 gallons, worth \$323,000. Aside from sugar and molasses, the principal item was tobacco, of which 666,000 pounds, worth \$112,000, were imported. Hides and skins, fruits and nuts, coffee, and alcoholic liquors were the only other articles of much importance. Of hides and skins 654,000 pounds, worth \$68,000, were imported. The imports of fruits and nuts had a value of \$71,000. Oranges were the leading fruit. Porto Rican coffee was purchased to the extent of 228,000 pounds, worth \$27,000. The alcoholic liquors procured from Porto Rico cost \$25,000, the consignments received amounting to 41,000 proof gallons, and consisting in the main of rum.

Following are detailed statistics as to the quantity and value of the agricultural products imported into the United States from Porto Rico during 1901 and 1902:

PHILIPPINE ISLANDS.

Manila hemp formed the principal part of our agricultural imports from the Philippines during 1902. The quantity of this fiber brought to our ports from the islands was 34,000 tons, with a value of \$6,318,000. The only other item of much importance was sugar, of which 11,424,000 pounds, worth \$188,000, were received.

Detailed statistics as to the quantity and value of the agricultural products imported from the Philippine Islands during 1901 and 1902 are presented in the following table:

#### AGRICULTURAL IMPORTS, BY CONTINENTS.

As in previous years, nearly a third of the agricultural produce imported into the United States was purchased from European nations. It is probable, however, that a considerable portion of this produce originated in countries remote from Europe, some of the European ports being extensive distributing points for merchandise derived from other quarters of the globe. The value of the agricultural produce, whether of European origin or not, that came to the United States from the ports of Europe during 1902 was \$132,989,000.

After Europe, South America was the continent that contributed most in 1902 to the agricultural import trade of the United States. South American countries and islands furnished products of agriculture having an aggregate value of \$93,190,000, and forming 23 per cent of the total amount imported.

Large shipments were also received from distant Asia, the agricultural produce supplied by that continent forming 20 per cent of the total, and amounting in value to \$82,496,000.

The adjacent countries of North America sold us agricultural produce to about the same extent as Asia, the value being \$82,025,000, or 20 per cent of the total.

Africa and Oceania together contributed less than 6 per cent of the agricultural produce received from abroad. The imports from Africa were valued at \$12,441,000, and those from Oceania at \$11,604,000.

Following is a table that shows the value of the agricultural produce imported into the United States from the several continents during each of the five years 1898-1902:

<sup>a</sup>The exceptionally small figures recorded for 1901 and 1902 are explained by the omission from the returns of imports from Hawaii.

#### AGRICULTURAL IMPORTS, BY PRINCIPAL ITEMS.

Named in the order of their value, the principal agricultural imports of the United States for 1902 ranked as follows: Coffee, animal fibers, hides and skins, sugar, vegetable fibers, fruits and nuts, alcoholic liquors, tobacco, tea, vegetable oils, cocoa and chocolate, and vegetables. The smallest of these twelve items had a value in excess of \$5,000,000.

Statistics showing the annual export value for 1898-1902 of the items mentioned are given in the following table:

*Value of the agricultural imports of the United States, by principal items, during each fiscal year from 1898 to 1902, inclusive.*

#### COFFEE.

During 1902 the United States expended \$71,000,000 in the importation of coffee. Three-fourths of the supply came from Brazil, the consignments received from that country having a value of \$54,000,000.

Venezuela, which is another South American country that engages extensively in coffee growing, sent us \$4,181,000 worth. From Mexico we made purchases aggregating \$2,837,000. Guatemala contributed shipments to the value of \$2,645,000. Other sources from which we imported coffee in considerable quantities last year were Costa Rica, the Dutch East Indies, and Colombia.

#### ANIMAL FIBERS.

Our import trade in the animal fibers, silk and wool, for 1902 amounted in value to \$60,000,000. We bought from foreign countries \$42,000,000 worth of silk and \$18,000,000 worth of wool.

*Silk.*—Nearly one-half of the silk imported came from Japan, our purchases from that country amounting to \$21,000,000. Italy sold us \$10,000,000 worth. From the Chinese Empire we received shipments valued at \$8,386,000. France sent consignments worth \$2,527,000.

*Wool.*—Of the wool imported during 1902 over one-third was procured in the markets of the United Kingdom, the sum paid being \$6,186,000. Argentina sent much larger shipments than usual, their value amounting to \$3,826,000. From British Australasia consignments worth \$2,129,000 were received. Wool was also imported quite extensively from European Russia and the Chinese Empire.

#### HIDES AND SKINS.

Hides and skins were imported last year to the value of \$58,000,000. The British East Indies, the United Kingdom, Argentina, and France were the leading sources of supply. From the British East Indies we received consignments aggregating \$9,736,000 in value. The United Kingdom supplied \$5,776,000 worth, Argentina \$5,614,000 worth, and France \$5,501,000 worth. Large shipments also came from Germany and from Mexico. The imports from Germany were valued at \$4,305,000, and those from Mexico at \$3,490,000. Additional countries that sold us hides and skins in considerable quantities were European Russia, the Chinese Empire, Brazil, Uruguay, Canada, Venezuela, Aden, and the Netherlands.

#### SUGAR.

Sugar was imported much less extensively in 1902 than during the years immediately preceding. The decrease in importation is partly explained by the fact that large quantities of sugar were withheld from shipment in the countries of origin awaiting possible changes in the United States tariff. Our imports from all sources, except Hawaii and Porto Rico, had an aggregate value of only \$55,000,000. Cuba continued to be the largest contributor, sending shipments worth \$18,000,000. The Dutch East Indies, which rank next to Cuba as a source of supply, sold us \$12,000,000 worth. Aside from Cuba and

the Dutch East Indies the countries furnishing the largest quantities were Brazil, Germany, British Guiana, and the British West Indies. From Brazil there were imports valued at \$4,909,000. Our purchases from Germany were exceptionally small, amounting to only \$3,597,000. British Guiana and the British West Indies contributed to about the same extent, the former sending \$3,372,000 worth, and the latter \$3,227,000 worth. Austria-Hungary, Santo Domingo, Peru, and Egypt stood foremost among the remaining sources of importation.

#### VEGETABLE FIBERS.

During 1902 vegetable fibers formed a much larger item than usual in our agricultural import trade, having an aggregate value of \$43,000,000. Mexico, Egypt, the United Kingdom, the Philippine Islands, and the British East Indies were the sources from which the supply chiefly came. From Mexico we imported \$12,000,000 worth, and from Egypt \$9,526,000 worth. The United Kingdom sent shipments valued at \$7,126,000. There were imports from the Philippines worth \$6,319,000, and from the British East Indies worth \$4,414,000.

#### FRUITS AND NUTS.

The United States expended \$21,000,000 during 1902 for imports of fruits and nuts. Our largest purchases were made from the British West Indies, Italy, and Spain. The imports from the British West Indies were valued at \$4,389,000, and those from Italy at \$4,387,000. Spain sent shipments worth \$2,502,000. Importations were also received to a considerable extent from Costa Rica, Greece, France, and Cuba.

#### ALCOHOLIC LIQUORS.

In the importation of alcoholic liquors the United States expended last year the considerable sum of \$15,000,000. France, the United Kingdom, and Germany were the countries from which the largest quantities came. Our purchases from France amounted in value to \$6,858,000. The United Kingdom supplied \$3,214,000 worth, and Germany \$2,345,000 worth.

#### TOBACCO.

Our imports of tobacco during 1902, like our liquor imports, had a value of about \$15,000,000. The tobacco came chiefly from two sources—Cuba and the Netherlands. From Cuba we purchased \$8,578,000 worth, while the Netherlands sent shipments valued at \$4,836,000. It was through the latter country we obtained our supply of Sumatra tobacco.

#### TEA.

For imported tea the United States paid last year \$9,390,000. The shipments received from Japan were valued at \$4,185,000, and those from the Chinese Empire at \$3,737,000. With the exception of the

British East Indies, where we made purchases aggregating \$396,000, Japan and China were the only important sources of supply.

#### VEGETABLE OILS.

An unusually heavy importation of vegetable oils occurred in 1902, the shipments received having an aggregate value of \$8,719,000. Our largest purchases were made in the United Kingdom, from which source we received consignments worth \$2,293,000. Italy sent shipments valued at \$1,839,000, while from France we imported \$1,362,000 worth. Other countries that contributed quite extensively last year to our import trade in vegetable oils were Germany, the British East Indies, and the Netherlands.

#### COCOA AND CHOCOLATE.

Our imports of cocoa and chocolate for 1902 had an aggregate value of \$7,054,000. The British West Indies formed the leading source of supply, sending shipments worth \$1,969,000. Other countries that contributed largely to this trade were Dutch Guiana, Brazil, and Ecuador. The imports from Dutch Guiana were valued at \$992,000, and those from Brazil at \$946,000. Ecuador sent consignments worth \$787,000.

#### VEGETABLES.

The vegetables imported during 1902 made an item of \$7,040,000. The United Kingdom and Canada were the countries from which the largest shipments came. From the former country we received \$1,965,000 worth, and from the latter \$1,024,000 worth. Belgium and France were also important sources of supply. The consignments from Belgium were valued at \$987,000, and those from France at \$760,000.

#### SOURCES OF AGRICULTURAL IMPORTS, IN DETAIL.

The tables presented on the following pages embrace all the agricultural imports of the United States that were statistically recorded during the five fiscal years 1898-1902, exhibiting for each article the extent of the annual importations received from the various sources of supply. For convenience in classification the articles are divided into two groups, consisting respectively of animal matter and vegetable matter. The tables are arranged in two series, the first relating to the value and the second to the quantity of the articles imported. To facilitate comparison, cross references are given from each table of values to the corresponding table of quantities, and vice versa. In some cases, however, values only are given, no returns having been made as to quantity. An index to the articles covered by the tables is printed on pages 147-150. The tables are as follows:

*Value of the agricultural imports of the United States (animal matter), by articles and countries, during the five fiscal years 1898-1902.*
